

18TH EDITION AMENDMENT NO.2 **WORKSHOP (CPD ACCREDITED)**

Classroom

Virtual
Classroom

e-learning

This 6-hour CPD workshop has been created to provide a full overview of the latest revision to BS 7671:2018 'Requirements for Electrical Installations - IET Wiring Regulations Eighteenth Edition' brought about by the release of Amendment 2:2022. It is aimed at those who are required to have a good working knowledge of the latest version of this core industry standard, by updating and building on previous understanding of this topic.

WHO SHOULD ATTEND?

This workshop is suitable for those who design, install, commission or maintain low-voltage electrical installations and who need to better understand the impact and implications of Amendment 2:2022.

Whilst the workshop is primarily aimed at **experienced electricians**, it will also be of benefit to those with an **existing understanding of BS 7671:2018** including allied trades as well as trade related professionals such as contract managers, installation designers, consultants, specifiers and surveyors.

Although there are no formal entry requirements, delegates will gain most from this CPD workshop if they already have a good understanding of BS 7671:2018.

WORK AREAS

The scope of BS 7671:2018 covers permanent and temporary installations in residential, commercial, public and industrial premises. It also includes requirements relating to special locations as well as considerations for energy efficiency.

WORKSHOP PROGRAMME

This workshop will provide an overview of the main changes introduced by Amendment 2:2022.

WHAT DO DELEGATES NEED TO HAVE FOR THE WORKSHOP?

To get the best out of this training, delegates should have access to the following for the duration of the workshop:

- A copy of BS 7671:2018 'Requirements for Electrical Installations - IET Wiring Regulations Eighteenth Edition' (including Amendment 2:2022)
- A scientific calculator with square root function

Please note, not having the above items for the duration of the training will compromise the quality of the learning.

Where applicable, we provide the Learners' Guide to complement the training given and to form a point of reference for use after the workshop. Refreshments are also included. Publications for our courses can be obtained from our sales team by contacting NICEIC Direct on 0333 015 6626 or online at: www.shop.niceic.com

PROGRESSION COURSES

- Combined initial verification and periodic inspection: City & Guilds 2391
- Level 4 Award in the Design and Verification of Electrical Systems

BOOKING AND FURTHER INFORMATION
