Maintenance of Fire Detection and Fire Alarm Systems

This course has been designed to provide the knowledge and understanding needed to be able to assist in the completion of the compliant maintenance and servicing of fire detection and fire alarm systems in accordance with the recommendations of BS 5839-1:2017.

Course duration 1 day

Who should attend?

This course is aimed at electricians and electrical contracting businesses as well as those who design or specify fire alarm and detection systems including those who have already completed our **Fundamentals of Fire Detection and Fire Alarm Systems** course and who already work within the electrical/fire industry and have a fundamental understanding of the requirements of fire detection and fire alarms in the UK.

Learning outcomes

This course will provide a greater understanding and knowledge of how to maintain and service fire detection and fire alarm systems in accordance with the recommendations of BS 5839-1:2017, how to complete the servicing certificate plus the recommendations for the takeover of existing systems.

Course outline
